

STATION PROCESS BRIEFING

EVERY LOG,
EVERY DAY

Processing LH Daily Vehicle Inspection Reports. **The station process starts at the drop point.**

PRATIK PATEL | LINEHAUL MANAGER | AUGUST 11, 2026

01 INSPECT → **02** HAND IN → **03** REVIEW → **04** ACTION → **05** FILE

AN INSPECTION YOU CAN'T PRODUCE IS AN INSPECTION THAT DIDN'T HAPPEN.

HOW IT GOES WRONG

THE DAILY RHYTHM

MINUTES A DAY

Receive at the drop point · review against the 9 points · action defects · file.

THE RECOVERY

MONTHS TO CLOSE

Corrective action plan · refresher training · weekly audits · a minimum of six weeks of validated logs · a passing retest.

Last Updated: 04/2022 / Dernière mise à jour : 04/2022

Company, and the printed name of the person conducting the inspection. Two fields that get skipped more than any others.

Truck, Trailers 1-8 and the Dolly — the dolly sits fourth, between Trailer 2 and Trailer 3. Unit #, Prov., plate, odometer, defect No/Yes, time with am/pm, and city of inspection.

Five rows: vehicle, Defect No. from Schedule 1 or List 1 (QC), status — Repaired or Not a defect — and the Authorized Person's Signature.

The clean-inspection checkbox. It does not replace the per-unit No/Yes boxes above.

Inspector's printed name, signature and date — then the second block, signed by the current driver whenever someone else conducted the inspection.

COMPLETED BY HAND - NO ELECTRONIC EDITS

THE LIFE OF AN LHDVIR

TSP DRIVER

COMPLETE & HAND IN
EVERY OPERATING DAY

THE STATION

LH MANAGER

TSP ACCOUNTABILITY
& ESCALATION

STEP 1 / THE DROP POINT

DAILY HAND-IN

DAILY MEANS DAILY — NOT WEEKLY BUNDLES.

NON-NEGOTIABLE

ONE DROP POINT

The station provides ONE designated, clearly labelled place — folder, mailbox or area — known to every TSP driver. A labelled mailbox outside the operations office works well.

EVERY OPERATING DAY

HAND IN ON RETURN

TSP drivers hand in the M-100CB every day they operate. The form does not leave the building in the truck.

SAME DAY

FLAG THE MISS

A missed hand-in is flagged the same day and goes to the LH Manager, who takes it up with the TSP.

LABEL IT SO A NEW DRIVER FINDS IT UNAIDED

SAME PLACE, EVERY DAY — NO ROTATING LOCATIONS

THE 9-POINT CHECK

1 · REAL FORM

Standard M-100CB booklet, completed by hand. **No electronic edits.**

2 · CITY

Full city, town or village. Ditto marks only if unchanged from the prior entry.

3 · DEFECT BOX

Yes or No for **every** unit listed. Blank or both ticked = non-compliant.

4 · TIME

Exact time, clearly am/pm or military.

5 · DATE

Full month, day and year.

6 · PRINTED NAME

Inspector's name printed in full.

7 · SIGNATURE

Inspector's signature present.

8 · DRIVER DECLARATION

Signed whenever someone other than the driver inspected. Blank is fine if the driver inspected.

9 · CO-DRIVER

Signature required on team operations only.

04

STEP 4 OF 5

■ HAND IN

■ REVIEW

■ DEFECTS

■ **FILE**

□ CORRECT

STANDARD
6 MONTHS AT STATION

STEP 4 / FILE IT

FILED, NOT FILED AWAY

6

Months

SAME DAY

Reviewed forms are filed the same day. Filing is part of the daily rhythm, not a someday task.

RETRIEVABLE ON DEMAND

Filed so that any driver plus any date range can be pulled on request — that is exactly how FCSA will ask for them.

SCALE THE FILING TO YOUR STATION

Smaller stations, fewer drivers: a folder per driver, by month. Larger operations: split by TSP, then by week — far fewer folders, and six months still fits one drawer. Either way, you must be able to get from driver → TSP → week.

A FORM WE **HAVE** BUT CAN'T **FIND** SCORES THE SAME AS ONE WE NEVER RECEIVED

- HAND IN
- REVIEW
- DEFECTS
- FILE
- **CORRECT**

RULE
FOUND ≠ FIXED

THE CORRECTION LOOP

WHEN IT'S A PATTERN, NOT A ONE-OFF

- 1 SAME-DAY CORRECTION**
Routine. Most fixes are a 30-second conversation the next morning.
- 2 LH MANAGER ↔ TSP**
Missing hand-ins entirely, or repeat errors from the same driver.
- 3 BUSINESS DISCUSSION**
Persistent non-compliance. Recorded in TRACS.

KEEP A SIMPLE CHASE LOG: DATE • DRIVER • ISSUE • RESOLUTION

THE LOG IS THE STATION'S PROOF THE PROCESS WAS WORKED

HOW FCSA TESTS US

Four questions, answered for one driver over one date range. Nothing here is new.

1

VALID EXEMPTION?

Driver didn't operate at all in the range, or the paperwork went to Legal at PGH. **Rentals are not exempt.**

2

HOW MANY WERE REQUIRED?

One per power unit, per day of operation — verified against TMS Driver Detail and the Driver Daily Log. Full off-duty days excluded.

3

HOW MANY ARE ON FILE?

This is the drop point and the filing convention, scored. **Retrievable, by driver and date.**

4

HOW MANY PASS?

Each filed form is scored against the same 9 completion points we review every day. **This is slide 6, scored.**

SIX COMMITMENTS

1

A LABELLED DROP POINT

One place, clearly marked, known to every TSP driver.

2

DAILY HAND-IN ENFORCED

Misses flagged to the LH Manager the same day.

3

DAILY 9-POINT REVIEW

Errors caught within 24 hours, while the driver is back tomorrow.

4

DEFECTS ACTIONED SAME DAY

FleetNet for major. MNTR priority for minor. Paper loop closed.

5

FILED & RETAINED 6 MONTHS

Retrievable by driver and by date, on demand.

6

END-OF-WEEK AUDIT

Five at random, checked by someone other than the filer. Results visible to leadership.

SIX COMMITMENTS. ONE DAILY RHYTHM. ZERO SURPRISES AT TEST TIME.

EVERY LOG,
EVERY DAY

QUESTIONS?

**THANK
YOU.**
